PROFESSIONAL SUMMARY

Full Stack Team Lead with 3+ years of experience delivering enterprise insurance platforms on the .NET Core / C# and Angular stack. Currently lead the OneSure insurance product at Centricity Wealth Tech, guiding a 5-member team across sprint planning, code review, and releases while staying hands-on across development, AWS DevOps, and third-party integrations.

PROFESSIONAL EXPERIENCE

Centricity Wealth Tech — Team Lead, OneSure (Insurance Platform) Aug 2025 – Present

Angular · .NET Core / C# · MySQL · AWS

- **Lead a team of 5 developers** on OneSure, an end-to-end insurance platform spanning travel, life, and motor quotation, proposal, and premium workflows — owning technical direction and on-time delivery.
- **Drive Agile sprint planning** and backlog grooming, translating business requirements into estimated, prioritized work for each sprint.
- **Own the code-review and PR-merge process** across the codebase, enforcing quality gates, branching strategy, and consistent architecture standards before merges to main.
- **Act as lead developer**, designing and building core Angular front-end modules and .NET Core / C# RESTful APIs for the insurance quotation and proposal lifecycle.
- **Manage DevOps and cloud infrastructure on AWS** — built an automated daily database backup pipeline syncing production backups to Amazon S3 via scheduled tasks, and maintained CI/CD delivery for reliable, repeatable releases.
- **Own third-party API integrations** end-to-end — integrating external insurer and service-provider systems into the OneSure platform with resilient, well-documented contracts and robust failure and retry handling.
- **Serve as the escalation point for production issues**, diagnosing and resolving live incidents quickly to protect uptime for a mission-critical system.
- **Rising Star Award** — recognized by Centricity Wealth Tech for outstanding ownership and contribution to the OneSure platform.

ICICI Lombard — Full Stack Developer (Angular & .NET C#) Jun 2023 – Jul 2025

Angular · .NET Core / C# · SQL Server

- **Contributed to mission-critical systems** for Motor, Commercial Vehicles, and Fleet Management insurance workflows serving high transaction volumes.
- **Designed and developed dynamic Angular UIs** and RESTful APIs using .NET Core and C#, delivering responsive, maintainable customer- and agent-facing screens.
- **Integrated Polly for API resiliency** and Hangfire for reliable background job processing, improving fault tolerance and throughput.
- **Built reusable component libraries** and standardized application-wide logging across all modules, reducing duplication and speeding up debugging.
- **Best Employee Award** — recognized at ICICI Lombard for consistent performance and delivery on business-critical modules.

Automobil / Autotekk — Software Developer Intern Jun 2022 – Jun 2023

Angular · .NET · Razorpay

- **Built an end-to-end inventory management** and transaction-logging portal using Angular and .NET.
- **Integrated the Razorpay payment gateway** end-to-end to power subscription-based access, covering secure checkout, payment verification, and subscription state handling.
- **Enabled Excel-based bulk uploads** and dynamic search filters, streamlining large-volume data entry for end users.
- **Applied clean architecture and DRY principles** with strong component/service reusability across the application.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Java, C, SQL, HTML, CSS

Frameworks & Libraries: .NET Core, ASP.NET Web API, Angular, ReactJS, Node.js, Flask, Hangfire, Polly, Bootstrap

Databases: MySQL, PostgreSQL, SQL Server, MongoDB

Cloud & DevOps: AWS (S3, EC2, RDS), Azure DevOps, CI/CD pipelines, Git, automated backup & scheduling, Linux (Ubuntu)

Integrations & Messaging: Third-party / insurer API integrations, payment gateways (Razorpay), Kafka, RESTful APIs

Practices & Tools: Agile / Scrum, Sprint Planning, Code Review & PR Management, Postman, VS Code, Git branching & merge strategy

KEY PROJECTS

Cricket Stars — Cricket Event Management Platform

Flutter (Dart) · .NET Backend · PostgreSQL

- Built a cricket event platform with match creation, team registration, live scoring, and tournament dashboards.
- Implemented real-time score updates, player statistics, ranking systems, match summaries, and leaderboards on scalable backend services.

ReuseIt — Online Waste Management Platform

Python · OpenCV · VGG16 · HTML/CSS/JS

- Developed a smart platform promoting sustainable waste management, using computer vision (OpenCV + VGG16) to classify household waste and suggest proper disposal.
- Integrated educational content and location-based disposal maps; finalist in the college tech showcase and featured in the departmental projects expo.

EDUCATION

Thadomal Shahani Engineering College, Mumbai University Jun 2023
Bachelor of Engineering in Information Technology — CGPA: 9.4 / 10

Kishinchand Chellaram College, Mumbai 2019
Higher Secondary Certificate (Science) — 81.69%

LEADERSHIP & EXTRACURRICULAR

- **The Squid Run:** Conceptualized and hosted a 40+ person themed game event with full game-station setup and prize distribution.
- **Fundraising Fair:** Organized a charity fair raising funds for underprivileged families through games and stalls.
